

Thailand Travel

As wonderful as Thailand is, there are times when you may want to do some traveling to other countries. In close proximity to other Southeast Asian countries like Laos, Burma, Cambodia, Malaysia, Indonesia and Singapore, Thailand is only a short flight to an exciting getaway. Longer trips to China, India, Nepal or Japan are definitely doable from Thailand and you may become quite a seasoned traveler before long.

The airport in Bangkok will make such trips convenient as there are direct flights to many of these countries as well as connections to North American, European and Australian destinations. Major airlines operate out of two airports as do several domestic airlines. These are reasonably priced airlines and the railway and bus lines are also affordable modes of transportation, comfortable and reliable. For getting around the cities, there are many inexpensive options: Public buses

Taxis

“Tuk-Tuks” (3-wheeled, open-air taxis)

Motorcycle taxis

Riverboat taxis and ferries

The Skytrain

The new, state-of-the-art Subway
